Transforming Sales & Marketing Performance through Data-Driven Insights

A case study of Ramadaootha Agro & Dairy Equipment Pvt. Ltd.

Why data-driven sales and marketing?

The company

- Makes dairy, agro and customised equipment, with installation, maintenance and after-sales support
- Competes with global names (Deere, GEA, Tetra Pak), domestic firms (Mahindra, Escorts Kubota, IDMC) and local fabricators
- Opening: affordable, customised, regional solutions backed by data

Study objectives

1. Analyse sales performance
2. Evaluate marketing strategies
3. Study customer behaviour
4. Identify gaps in current practices
5. Suggest data-driven improvements

Research design: 30 respondents

30
respondents: employees, customers, dealers

5-point
Likert questionnaire plus company records

76.7%
graduate or postgraduate

40%
have more than 5 years of experience

CRM adoption and a regular data-review habit

60%

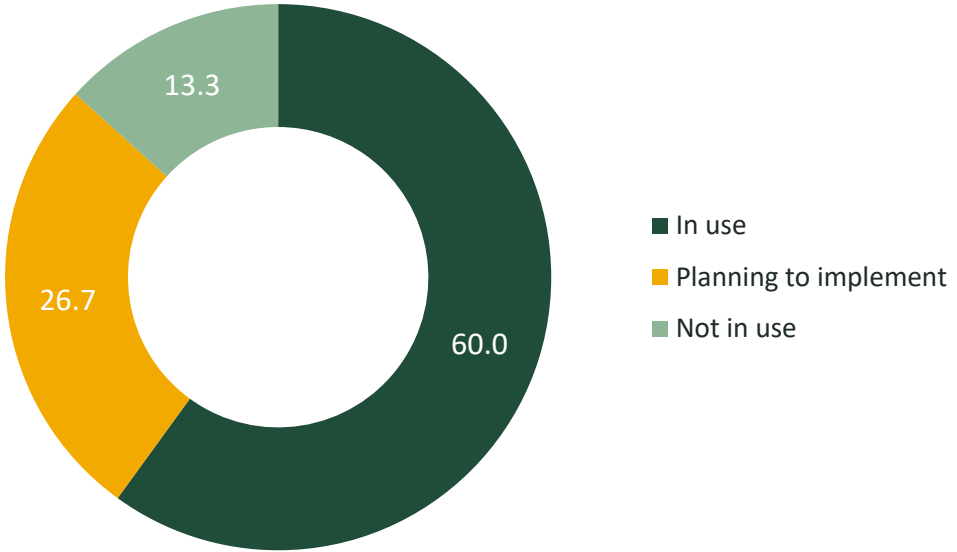

CRM or sales management system is in use

26.7%

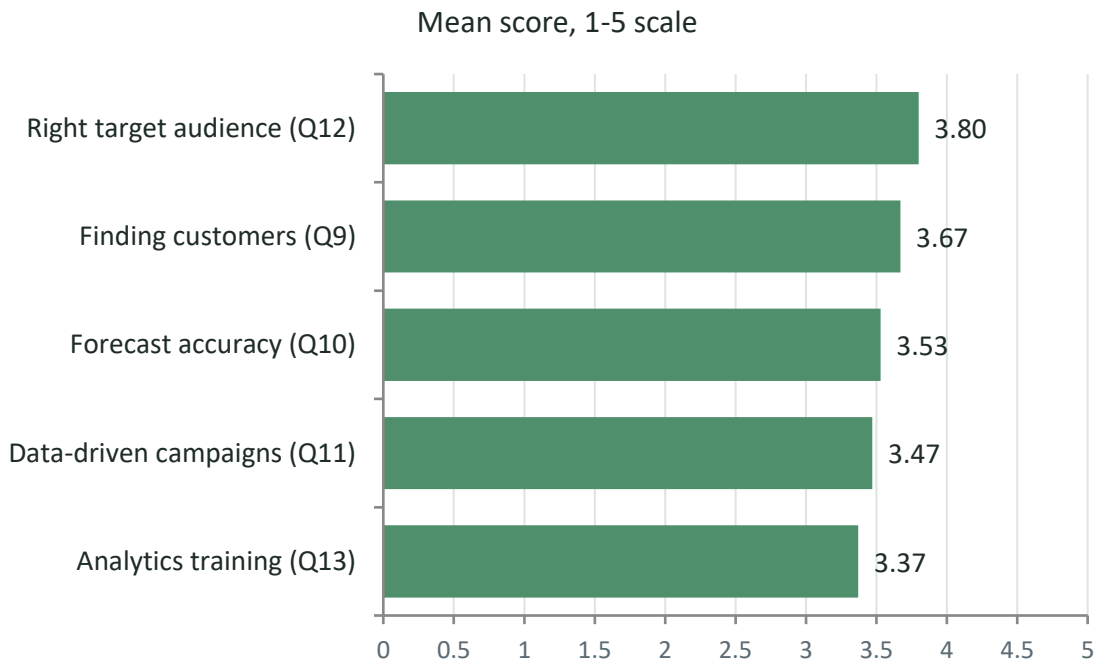

are planning to implement one

70%

review sales data daily (30%) or weekly (40%)

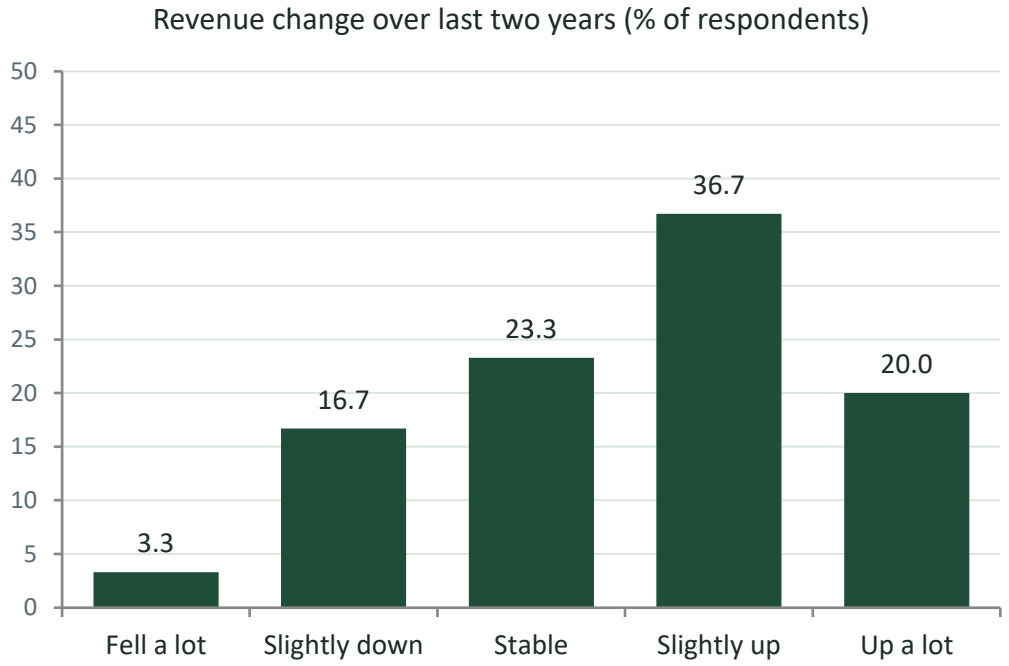

Data practices score well, but training lags

3.37

is the lowest score: the team is the weakest link, not the tools.

Sales: revenue up, conversion solid

56.7%

report higher revenue; only 20% report a decline

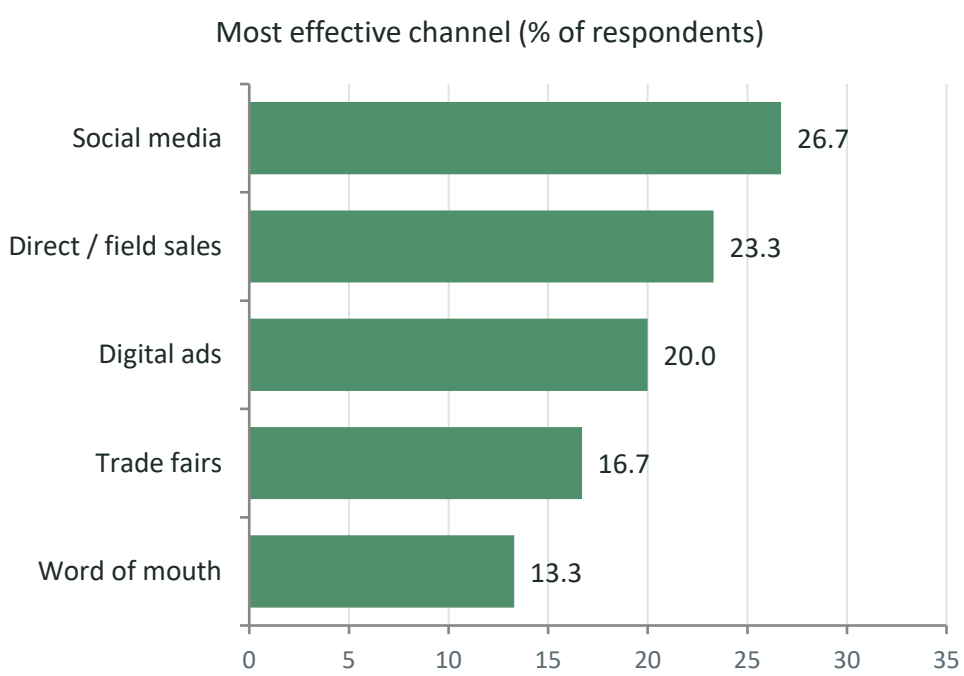

53.3%

convert 25-75% of leads

23.3%

convert more than 50% of leads

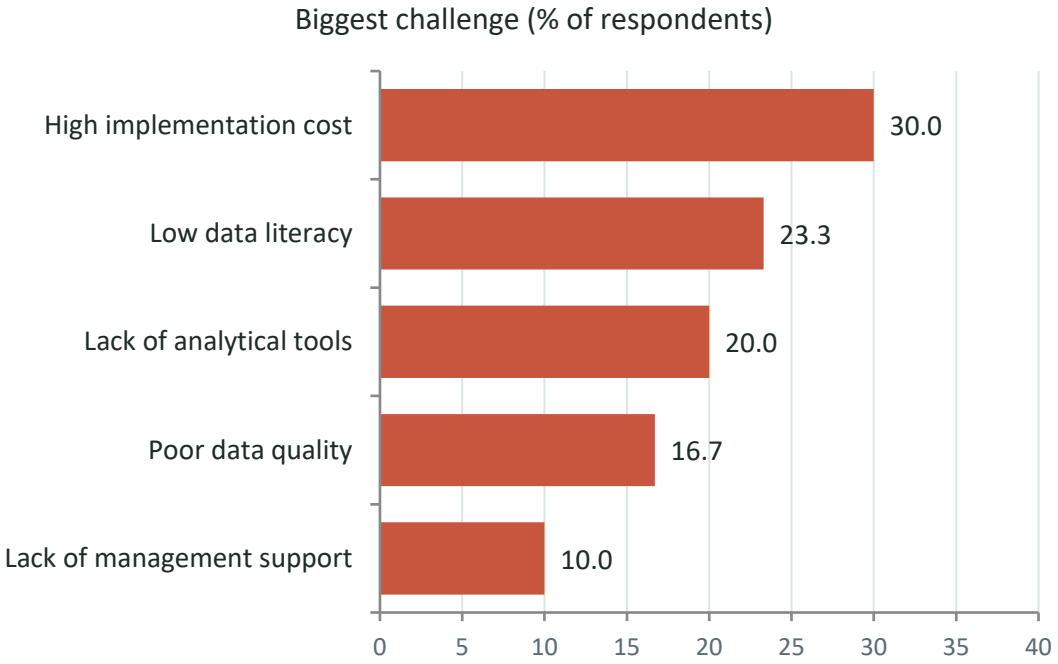

Marketing: social media leads

Perceived impact of data on marketing (mean, 1-5)

3.60	Strategy effectiveness
3.57	Retention via personalisation
3.53	Lower spend, better ROI
3.50	KPIs tracked regularly

Barriers: cost and data literacy hold adoption back

73.3%

name cost, data literacy or missing tools as the main barrier.

Data infrastructure satisfaction is the lowest section score at 3.40.

Data-driven practices measurably lift performance

4.10

out of 5: overall transformation score, the highest in the study

76.6% agree or strongly agree that data-driven insights transformed sales and marketing.

0.842

Cronbach's alpha: the scale is reliable (above 0.7)

r = 0.72 / 0.68

Data-driven practices vs marketing / sales performance ($p < 0.01$)

$R^2 = 0.551$

Share of performance variation explained by data-driven practices

$p < 0.05$

ANOVA: null hypothesis rejected, impact is significant

What to do next

1. **Scale CRM and dashboards**

   Centralise customer data and build real-time dashboards for forecasting and segmentation.

2. **Build data skills**

   Run regular analytics and CRM workshops to close the 3.37 training gap.

3. **Sharpen digital marketing**

   Put targeted social and digital spend behind the channels that already work.

4. **Lower the cost barrier**

   Use affordable cloud tools, flexible pricing and installment options.

Conclusion: data-driven insight is already lifting sales and marketing at Ramadaootha. Training, cost-effective tools and better after-sales response will turn early gains into lasting advantage.
